### **ANNOUNCEMENT**

### FINANCIAL DATA OF SINOCHEM FERTILIZER FOR THE YEAR ENDED 31 DECEMBER 2020 AND THE THREE MONTHS ENDED 31 MARCH 2021

This announcement is made by Sinofert Holdings Limited (the "Company", together with its subsidiaries, the "Group") pursuant to the inside information provisions under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and Rules 13.09(2)(a) and 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Reference is made to the announcements of the Company dated 26 February 2021 and 3 March 2021 in relation to the issue of super & short-term commercial paper by Sinochem Fertilizer Company Limited ("Sinochem Fertilizer"), an indirect wholly-owned subsidiary of the Company.

According to the relevant PRC regulations, Sinochem Fertilizer is required to publish its financial data on a quarterly basis on the website of Shanghai Clearing House at www.shclearing.com and the website of China Money at www.chinamoney.com.cn during the term of the above debts. Set out below are the audited financial data of Sinochem Fertilizer for the year ended 31 December 2020 and the unaudited financial data of Sinochem Fertilizer for the three months ended 31 March 2021, which are prepared in accordance with the China Accounting Standards for Business Enterprises, and have no material difference from those prepared in accordance with the Hong Kong Financial Reporting Standards. The financial data of Sinochem Fertilizer for the year ended 31 December 2020 contained herein have been consolidated into the accounts of the Group for the year ended 31 December 2020 published by the Company on 30 March 2021.

Shareholders of the Company and potential investors are advised to exercise caution in dealing in the securities of the Company.

## For and on behalf of the Board SINOFERT HOLDINGS LIMITED Qin Hengde

Executive Director and Chief Executive Officer

Hong Kong, 28 April 2021

As at the date of this announcement, the executive directors of the Company are Mr. Qin Hengde (Chief Executive Officer), Mr. Feng Mingwei and Mr. Harry Yang; the non-executive director of the Company is Mr. J. Erik Fyrwald (Chairman); and the independent non-executive directors of the Company are Mr. Ko Ming Tung, Edward, Mr. Lu Xin and Mr. Tse Hau Yin, Aloysius.

ENGLISH TRANSLATION OF FINANCIAL STATEMENTS FOR THE YEAR 1 JANUARY 2020 TO 31 DECEMBER 2020 IF THERE IS ANY CONFLICT BETWEEN THE CHINESE VERSION AND ITS ENGLISH TRANSLATION, THE CHINESE VERSION WILL PREVAIL

### **AUDITOR'S REPORT**

毕马威华振审字第 2102709 号

The Board of Directors of Sinochem Fertilizer Co., Ltd.:

### Opinion

We have audited the accompanying financial statements of Sinochem Fertilizer Co., Ltd. ("Sinochem Fertilizer") set out on pages 1 to 87, which comprise the consolidated and company balance sheets as at 31 December 2020, the consolidated and company income statements, the consolidated and company cash flow statements, the consolidated and company statements of changes in owners' equity for the year then ended, and notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company financial position of Sinochem Fertilizer as at 31 December 2020, and the consolidated and company financial performance and cash flows of Sinochem Fertilizer for the year then ended in accordance with Accounting Standards for Business Enterprises issued by the Ministry of Finance of the People's Republic of China.

### **Basis for Opinion**

We conducted our audit in accordance with China Standards on Auditing for Certified Public Accountants ("CSAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of Sinochem Fertilizer in accordance with the China Code of Ethics for Certified Public Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Accounting Standards for Business Enterprises, and for the design, implementation and maintenance of such internal control necessary to enable that the financial statements are free from material misstatement, whether due to fraud or error.

### AUDITOR'S REPORT (continued)

毕马威华振审字第 2102709号

### Responsibilities of Management and Those Charged with Governance for the Financial Statements (continued)

In preparing the financial statements, management is responsible for assessing Sinochem Fertilizer's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Sinochem Fertilizer or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Sinochem Fertilizer's financial reporting process.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
  The risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions,
  misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of Sinochem Fertilizer's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

### **AUDITOR'S REPORT (continued)**

毕马威华振审字第 2102709 号

### Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Sinochem Fertilizer's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Sinochem Fertilizer to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Sinochem Fertilizer to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sinochem Fertilizer Co., Ltd. Notes to the financial statements (Expressed in Renminbi Yuan)

### 1 Company status

Sinochem Fertilizer Co., Ltd. (the "Company"), previously known as Sinochem International Fertilizer Trading Co., Ltd., was founded in April 1993 with its head office located in Beijing. The Company was restructured as a foreign-owned enterprise held by China Fertilizer (Holdings) Co., Ltd. ("China Fertilizer") with the approval of the Commerce department (Foreign economic and Trade Committee) [2005] 0001 on 12 January 2005 and the registered capital is RMB 10,600,000,000.00. The parent of the Company is China Fertilizer, and its ultimate holding company is China National Chemical Co., Ltd. ("ChemChina").

The major operations of the Company together with its subsidiaries (hereinafter collectively referred to as "the Group") include: manufacture fertilizer raw materials, fertilizer products and fodder, wholesales of hazardous chemical (excluding state-operated trading), purchase and sales of minerals, sales of home-made products, import and export of fertilizer raw materials, fertilizer products and pesticide, commission agency and its supporting businesses (excluding state-operating trading and import), wholesales and retails of fertilizer raw materials, fertilizer products and pesticide, operate fertilizer related businesses and fertilizer related technology development, technical services and technology consulting, property management of self-owned real estate (including scriptorium leasing), warehousing services, wholesales and retails of non-subpackaged seeds.

### 2 Basis of preparation

The financial statements have been prepared on the going concern basis.

### (1) Statement of compliance

The financial statements have been prepared in accordance with the requirements of Accounting Standards for Business Enterprises or referred to as China Accounting Standards ("CAS") issued by the Ministry of Finance ("MOF"). These financial statements present truly and completely the consolidated financial position and financial position of the Company as at 31 December 2020, and the consolidated financial performance and financial performance and the consolidated cash flows and cash flows of the Company for the year then ended.

### (2) Accounting year

The accounting year of the Group is from 1 January to 31 December.

### (3) Functional currency and presentation currency

The Company's functional currency is Renminbi and these financial statements are presented in Renminbi. Functional currency is determined by the Company and its subsidiaries on the basis of the currency in which major income and costs are denominated and settled.

- 3 Significant accounting policies and accounting estimates
- (1) Business combinations and consolidated financial statements
  - (a) Business combinations not involving enterprises under common control

A business combination not involving enterprises under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties both before and after the business combination. Where (1) the aggregate of the acquisition-date fair value of assets transferred (including the acquirer's previously held equity interest in the acquiree), liabilities incurred or assumed, and equity securities issued by the acquirer, in exchange for control of the acquiree, exceeds (2) the acquirer's interest in the acquisition-date fair value of the acquiree's identifiable net assets, the difference is recognized as goodwill. If (1) is less than (2), the difference is recognized in profit or loss for the current period. Acquisition-related costs are expensed when incurred. Any difference between the fair value and the carrying amount of the assets transferred as consideration is recognized in profit or loss. The acquiree's identifiable asset, liabilities and contingent liabilities, if the recognition criteria are met, are recognized by the Group at their acquisition-date fair value. The acquisition date is the date on which the acquirer obtains control of the acquiree.

### (b) Consolidated financial statements

The scope of consolidated financial statements is based on control and the consolidated financial statements comprise the Company and its subsidiaries. Control exists when the investor has all of following: power over the investee; exposure, or rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered. The financial position, financial performance and cash flows of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Where a subsidiary was acquired during the reporting period, through a business combination not involving enterprises under common control, the identifiable assets and liabilities of the acquired subsidiaries are included in the scope of consolidation from the date that control commences, based on the fair value of those identifiable assets and liabilities at the acquisition date.

When the accounting period or accounting policies of a subsidiary are different from those of the Company, the Company makes necessary adjustments to the financial statements of the subsidiary based on the Company's own accounting period or accounting policies. Intra-group balances and transactions, and any unrealised profit or loss arising from intra-group transactions, are eliminated when preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains, unless they represent impairment losses that are recognized in the financial statements.

Non-controlling interests are presented separately in the consolidated balance sheet within owners' equity. Net profit or loss attributable to non-controlling shareholders is presented separately in the consolidated income statement below the net profit line item. Total comprehensive income attributable to non-controlling shareholders is presented separately in the consolidated income statement below the total comprehensive income line item. When the amount of loss for the current period attributable to the non-controlling shareholders of a subsidiary exceeds the non-controlling shareholders' portion of the opening balance of owners' equity of the subsidiary, the excess is still allocated against the non-controlling interests. Changes in the interest in a subsidiary without a change in control are accounted for as equity transactions.

When the Group loses control over a subsidiary, any resulting disposal gains or losses are recognized as investment income for the current period

### (2) Translation of foreign currencies

When the Group receives capital in foreign currencies from investors, the capital is translated to Renminbi at the spot exchange rate on the date of the receipt. Other foreign currency transactions are, on initial recognition, translated to Renminbi at the spot exchange rate on the dates of the transactions.

Monetary items denominated in foreign currencies are translated to Renminbi at the spot exchange rate at the balance sheet date. The resulting exchange differences are generally recognized in profit or loss, unless they arise from the re-translation of the principal and interest of specific borrowings for the acquisition, construction or production of qualifying assets (see Note 3(22)). Non-monetary items that are measured at historical cost in foreign currencies are translated to Renminbi using the exchange rate at the transaction date.

### (3) Cash and Cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily withdrawn on demand, and short-term, highly liquid investments that are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

### (4) Inventories

Inventories are initially measured at cost. Cost of inventories comprises all costs of purchase, costs of conversion and other expenditures incurred in bringing the inventories to their present location and condition. Cost of inventories is calculated using the weighted average method. In addition to the purchasing cost of raw materials, work in progress and finished goods include direct labour costs and an appropriate allocation of production overheads.

At the balance sheet date, inventories are carried at the lower of cost and net realisable value.

Any excess of the cost over the net realisable value of each class of inventories is recognized as a provision for impairment, and is recognized in profit or loss. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale including relevant taxes.

### (5) Long-term equity investments

### (a) Investments in subsidiaries

In the Group's consolidated financial statements, investments in subsidiaries are accounted for in accordance with the principles described in Note 3(1)(b).

In the Company's separate financial statements, investments in subsidiaries are measured as follows:

- For a long-term equity investment obtained through a business combination not involving enterprises under common control, the initial cost comprises the aggregate of the fair value of assets transferred, liabilities incurred or assumed, and equity securities issued by the Company, in exchange for control of the acquiree.
- An investment in a subsidiary acquired other than through a business combination is initially recognized in accordance with the principles described in Note 3(5)(b).

In the Company's separate financial statements, long-term equity investments in subsidiaries are accounted for using the cost method, unless the investment is classified as held for sale (see Note 3(12)). Except for cash dividends or profit distributions declared but not yet distributed that have been included in the price or consideration paid in obtaining the investments, the Company recognizes its share of the cash dividends or profit distributions declared by the subsidiary as investment income in the current period. The investments in subsidiaries are stated in the balance sheet at cost less impairment losses (see Note 3(14)(b)).

### (b) Investments in joint ventures and associates

A joint venture is an arrangement whereby the Group and other parties have joint control and rights to the net assets of the arrangement.

An associate is an enterprise over which the Group has significant influence.

An investment in a joint venture or an associate is initially recognized at the amount of cash paid if the Group acquires the investment by cash.

An investment in a joint venture or an associate is accounted for using the equity method, unless the investment is classified as held for sale (see Note 3(12)).

The accounting treatments under the equity method adopted by the Group are as follows:

- Where the initial cost of a long-term equity investment exceeds the Group's interest in the fair value of the investee's identifiable net assets at the date of acquisition, the investment is initially recognized at cost. Where the initial investment cost is less than the Group's interest in the fair value of the investee's identifiable net assets at the date of acquisition, the investment is initially recognized at the investor's share of the fair value of the investee's identifiable net assets, and the difference is recognized in profit or loss.
- After the acquisition of the investment, the Group recognizes its share of the investee's profit or loss and other comprehensive income as investment income or losses and other comprehensive income respectively, and adjusts the carrying amount of the investment accordingly. Once the investee declares any cash dividends or profit distributions, the carrying amount of the investment is reduced by the amount attributable to the Group. Changes in the Group's share of the investee's owners' equity, other than those arising from the investee's net profit or loss, other comprehensive income or profit distribution ("other changes in owners' equity"), is recognized directly in the Group's equity, and the carrying amount of the investment is adjusted accordingly.
- In calculating its share of the investee's net profits or losses, other comprehensive income and other changes in owners' equity, the Group recognizes investment income and other comprehensive income after making appropriate adjustments to align the accounting policies or accounting periods with those of the Group based on the fair value of the investee's identifiable net assets at the date of acquisition. Unrealized profits and losses resulting from transactions between the Group and its associates or joint ventures are eliminated to the extent of the Group's interest in the associates or joint ventures. Unrealized losses resulting from transactions between the Group and its associates or joint ventures are eliminated in the same way as unrealized gains but only to the extent that there is no impairment.
- The Group discontinues recognizing its share of further losses of the investee after the carrying amount of the long-term equity investment and any long-term interest that in substance forms part of the Group's net investment in the joint venture or associate is reduced to zero, except to the extent that the Group has an obligation to assume additional losses. If the joint venture or associate subsequently reports net profits, the Group resumes recognizing its share of those profits only after its share of the profits equals the share of losses not recognized.
- The factors of other changes in the owner's equity of the investee, except for net profit and loss, other comprehensive income and profit distribution, mainly include the investee's acceptance of capital investment from other shareholders, the equity components contained in the convertible bonds issued by the investee for separable transactions, equity settled share based payment, equity based payment, and other factors Other shareholders' capital increase to the investee leads to the change of shareholding ratio of the group. The group shall calculate its share according to the proportion of equity held, adjust the book value of long-term equity investment, and record it into capital reserve (other capital reserves) and register it in the memo book. When the group disposes the equity investment subsequently but still uses the equity method to calculate the remaining equity, it shall include this part of capital reserve into the current investment income according to the proportion of disposal; When the residual equity is accounted with the equity method, all the capital reserves are included in the current investment income.

The Group makes provision for impairment of investments in joint ventures and associates in accordance with the principles described in Note 3(14)(b).

### (6) Investment properties

Investment properties are properties held either to earn rental income or for capital appreciation or for both. Investment properties are accounted for using the cost model and stated in the balance sheet at cost less accumulated depreciation, amortisation and impairment losses (see Note 3(14)(b)). The cost of investment property, less its estimated residual value and accumulated impairment losses, is depreciated or amortised using the straight-line method over its estimated useful life, unless the investment property is classified as held for sale.

|                     | Estimated useful life (years) | Residual value rate | Depreciation rate |
|---------------------|-------------------------------|---------------------|-------------------|
| Plant and buildings | 20 - 45                       | 3% - 5%             | 2.10% - 4.75%     |

### (7) Fixed assets and construction in progress

Fixed assets represent the tangible assets held by the Group for use in the production of goods or supply of services or administrative purposes with useful lives over one year.

Fixed assets are stated in the balance sheet at cost less accumulated depreciation and impairment losses (see Note 3(14)(b)). Construction in progress is stated in the balance sheet at cost less impairment losses (see Note 3(14)(b)).

The cost of a purchased fixed asset comprises the purchase price, related taxes, and any directly attributable expenditure for bringing the asset to working condition for its intended use. The cost of self-constructed assets includes the cost of materials, direct labour, capitalized borrowing costs (see Note 3(22)), and any other costs directly attributable to bringing the asset to working condition for its intended use.

Construction in progress is transferred to fixed assets when it is ready for its intended use. No depreciation is provided against construction in progress.

Any subsequent costs including the cost of replacing part of an item of fixed assets are recognized as assets when it is probable that the economic benefits associated with the costs will flow to the Group, and the carrying amount of the replaced part is derecognized. The costs of the day-to-day maintenance of fixed assets are recognized in profit or loss as incurred.

Gains or losses arising from the retirement or disposal of an item of fixed asset are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognized in profit or loss on the date of retirement or disposal.

The cost of fixed asset, less its estimated residual value and accumulated impairment losses, is depreciated using the straight-line method over its estimated useful life. The estimated useful lives, residual value rates and depreciation rates of each class of fixed assets are as follows:

|                            | Estimated useful life (years)                                | Residual value rate | Depreciation rate |
|----------------------------|--|---------------------|-------------------|
| Plant and buildings        | 20 - 30  | 3% - 5%             | 3.17% - 4.85%     |
| Machinery and equipment    | 10 - 14  | 3% - 5%             | 6.79% - 9.70%     |
| Office and other equipment | 8  | 3% - 5%             | 11.88% - 12.13%   |
| Underground structures     | Depreciate under output method based on recoverable reserves |                     |                   |
| Motor vehicles             | 4  | 3% - 5%             | 23.75% - 24.25%   |

Useful lives, residual values and depreciation methods are reviewed at least at each year-end.

### (8) Leases

A contract is lease if the lessor conveys the right to control the use of an identified asset to lessee for a period of time in exchange for consideration.

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- the contract involves the use of an identified asset. An identified asset may be specified explicitly or implicitly speicied in a contrat and should be physically distinct, or capacity portion or other portion of an asset that is not physically distinct but it represents substantially all of the capacity of the asset and thereby provides the customer with the right to obtain substantially all of the ecomonic benefits from the use of the asset. If the supplier has a substantive substitution right throughout the period of use, then the asset is not identified;
- the lessee has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use;
- the lessee has the right to direct the use of the asset.

For a contract that contains more separate lease componets, the lessee and the lessor separate lease components and account for each lease component as a lease separately. For a contract that contains lease and non-lease components, the lessee and the lessor separate lease components from non-lease components. For a contract that contains lease and non-lease components, the lessee allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

### (a) As a lessee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability, any lease payments made at or before the commencement date (less any lease incentives received), any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is depreciated using the straight-line method. If the lessee is reasonably certain to exercise a purchase option by the end of the lease term, the right-of-use asset is depreciated over the remaining useful lives of the underlying asset. Otherwise, the right-of-use asset is depreciated from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. Impairment losses of right-of-use assets are accounted for in accordance with the accounting policy described in Note 3(14)(b).

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

A constant periodic rate is used to calculate the interest on the lease liability in each period during the lease term with a corresponding charge to profit or loss or included in the cost of assets where appropriate. Variable lease payments not included in the measurement of the lease liability is charged to profit or loss or included in the cost of assets where appropriate as incurred.

Under the following circumstances after the commencement date, the Group remeasures lease liabilities based on the present value of revised lease payments:

- there is a change in the amounts expected to be payable under a residual value guarantee;
- there is a change in future lease payments resulting from a change in an index or a rate used to determine those payments;
- there is a change in the assessment of whether the Group will exercise a purchase, extension or termination option, or there is a change in the exercise of the extension or termination option.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases in profit or loss or as the cost of the assets where appropriate using the straight-line method over the lease term.

### (b) As a lessor

The Group determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset irrespective of whether the legal title to the asset is eventually transferred. An operating lease is a lease other than a finance lease.

When the Group is a sub-lessor, it assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies practical expedient described above, then it classifies the sub-lease as an operating lease.

Under a finance lease, at the commencement date, the Group recognizes the finance lease receivable and derecognizes the finance lease asset. The finance lease receivable is initially measured at an amount equal to the net investment in the lease. The net investment in the lease is measured at the aggregate of the unguaranteed residual value and the present value of the lease receivable that are not received at the commencement date, discounted using the interest rate implicit in the lease.

The Group recognizes finance income over the lease term, based on a pattern reflecting a constant periodic rate of return. Variable lease payments not included in the measurement of net investment in the lease are recognized as income as they are earned.

Lease receipts from operating leases is recognized as income using the straight-line method over the lease term. The initial direct costs incurred in respect of the operating lease are initially capitalised and subsequently amortised in profit or loss over the lease term on the same basis as the lease income. Variable lease payments not included in lease receipts are recognized as income as they are earned.

### (9) Intangible assets

Intangible assets are stated in the balance sheet at cost less accumulated amortization (where the estimated useful life is finite) and impairment losses (see Note 3(14)(b)).

For an intangible asset with finite useful life, its cost less estimated residual value and accumulated impairment losses is amortized using the straight-line method over its estimated useful life, unless the intangible asset is classified as held for sale. The respective amortization periods for such intangible assets are as follows:

Amortization period

Land use right

Mining rights Others

10 - 50 years Depreciate under output method based on recoverable reserves 10 - 20 years The development cost of research and development projects within the Group are divided into research phase and development phase. The cost for the research phase are charged in the current profit and loss when they occur. Cost in the development phase are capitalized if a product or process developed is technically and commercially feasible and the Group has sufficient resources and intention to complete the development work and the development phase expenditure is reliably measured. Capitalized development cost are stated in the balance sheet at cost less impairment losses (see Note 3(14)(b)). Other development expenses are recognized as expenses in the period in which they are incurred.

Useful lives and amortisation methods of intangible asset with finite useful life are reviewed at least at each year-end.

### (10) Goodwill

The initial cost of goodwill represents the excess of cost of acquisition over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under a business combination not involving enterprises under common control.

Goodwill is not amortized and is stated in the balance sheet at cost less accumulated impairment losses (see Note 3(14)(b)). On disposal of an asset group or a set of asset groups, any attributable goodwill is written off and included in the calculation of the profit or loss on disposal.

### (11) Long-term deferred expenses

Expenditure incurred with beneficial period over one year is recognized as long-term deferred expenses. Long-term deferred expenses are stated in the balance sheet at cost less accumulated amortisation and impairment losses (see Note 3(14)(b)).

Long-term deferred expenses are amortised over their beneficial periods. The respective amortisation periods for the long-term deferred expenses are as follows:

Amortisation period 2 - 5 years 3 - 7 years

Catalyzer Others

### (12) Assets held for sale

The Group classifies a non-current asset or disposal group as held for sale when the carrying amount of the non-current asset or disposal group will be recovered through a sale transaction rather than through continuing use.

The disposal group is a group of assets to be disposed of, by sale or otherwise, together as a whole in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction

A non-current asset or disposal group is classified as held for sale when all the following criteria are met:

- According to the customary practices of selling such asset or disposal group in similar transactions, the non-current asset or disposal group is available for immediate sale in its present condition;
- The sale is highly probable to occur, that is, the Group has made a resolution on a sale plan and entered into a legally binding purchase agreement with other parties. The sale is expected to be completed within one year.

Non-current assets or disposal groups held for sale are initially and subsequently measured at the lower of carrying amount and fair value (see Note 3(15)) less costs to sell (except financial assets (see Note 3(13)) and deferred tax assets (see Note 3(17)). Any excess of the carrying amount over the fair value (see Note 3(15)) less costs to sell is recognized as an impairment loss in profit or loss.

### (13) Financial instruments

Financial instruments include cash at bank and on hand, investments in debt and equity securities other than those classified as long-term equity investments (see Note 3(5)), receivables, payables, loans and borrowings, debentures payable and paid-in capital.

(a) Recognition and measurement of financial assets and financial liabilities

A financial asset or financial liability is recognized in the balance sheet when the Group becomes a party to the contractual provisions of a financial instrument.

A financial assets (unless it is a trade receivable without a significant financing component) and financial liabilities is measured initially at fair value. For financial assets and financial liabilities at fair value through profit or loss, any related directly attributable transaction costs are charged to profit or loss; for other categories of financial assets and financial liabilities, any related directly attributable transaction costs are included in their initial costs. A trade receivable without a significant financing component or unconsidering the financing component in contract over one year is initially measured at the transaction price according to Note 3(19).

### (b) Classification and subsequent measurement of financial assets

### (i) Classification of financial assets

The classification of financial assets is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. On initial recognition, a financial asset is classified as measured at amortised cost, at fair value through other comprehensive income ("FVOCI"), or at fair value through profit or loss ("FVTPL").

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by-investment basis

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The business model refers to how the Group manages its financial assets in order to generate cash flows. That is, the Group's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. The Group determines the business model for managing the financial assets according to the facts and based on the specific business objective for managing the financial assets determined by the Group's key management personnel.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The Group also assesses whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

#### (ii) Subsequent measurement of financial assets

#### - Financial assets at FVTPL

These financial assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

#### Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. A gain or loss on a financial asset that is measured at amortised cost shall be recognized in profit or loss when the financial asset is derecognized, reclassified, through the amortisation process or in order to recognize impairment gains or losses.

#### Equity investments at FVOCI

These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss. Other net gains and losses are recognized in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to retained earnings.

#### (c) Classification and subsequent measurement of financial liabilities

Financial liabilities are classified as measured at FVTPL or amortised cost.

#### Financial liabilities at FVTPL

A financial liability is classified as at FVTPL if it is classified as held-for-trading (including derivative financial liability) or it is designated as such on initial recognition.

Financial liabilities at FVTPL are subsequently measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

#### - Financial liabilities at amortised cost

Other financial liabilities are subsequently measured at amortised cost using the effective interest method.

#### (d) Offsetting

Financial assets and financial liabilities are generally presented separately in the balance sheet, and are not offset. However, a financial asset and a financial liability are offset and the net amount is presented in the balance sheet when both of the following conditions are satisfied:

- the Group currently has a legally enforceable right to set off the recognized amounts;
- the Group intends either to settle on a net basis, or to realise the financial asset and settle the financial liability simultaneously.

#### (e) Derecognition of financial assets and financial liabilities

Financial asset is derecognized when one of the following conditions is met:

- the Group's contractual rights to the cash flows from the financial asset expire;
- the financial asset has been transferred and the Group transfers substantially all of the risks and rewards of ownership of the financial asset; or
- the financial asset has been transferred, although the Group neither transfers nor retains substantially all of the risks and rewards of ownership of the financial asset, it does not retain control over the transferred asset.

Where a transfer of a financial asset in its entirety meets the criteria for derecognition, the difference between the two amounts below is recognized in profit or loss:

- the carrying amount of the financial asset transferred measured at the date of derecognition;
- the sum of the consideration received from the transfer and, when the transferred financial asset is a debt investment at FVOCI, any cumulative gain or loss that has been recognized directly in other comprehensive income for the part derecognized.

The Group derecognizes a financial liability (or part of it) only when its contractual obligation (or part of it) is extinguished.

#### (f) Equity instrument

Except for the paid-in capital contributed by the investors, the Company does not have public equity instrument.

### (14) Impairment of assets

Except for impairment of assets in Notes 3(4) and (17), impairment of assets is accounted for using the following principles:

#### (a) Impairment of financial instruments

The Group recognizes loss allowances for expected credit loss (ECL) on:

- financial assets measured at amortised cost.

Financial assets measured at fair value, including debt investments or equity securities at FVPL and equity securities designated at FVOCI, are not subject to the ECL assessment.

#### Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

The maximum period considered when estimating ECLs is the maximum contractual period (including extension options) over which the group is exposed to credit risk.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the balance sheet date (or a shorter period if the expected life of the instrument is less than 12 months).

Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECL. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the balance sheet date.

Except for trade receivables and contract assets, the Group measures loss allowance at an amount equal to 12-month ECL for the following financial instruments, and at an amount equal to lifetime ECL for all other financial instruments.

- If the financial instrument is determined to have low credit risk at the balance sheet date
- If the credit risk on a financial instrument has not increased significantly since initial recognition

#### Financial instruments that have low credit risk

The credit risk on a financial instrument is considered low if the financial instrument has a low risk of default, the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

#### Significant increases in credit risk

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Group compares the risk of default occurring on the financial instrument assessed at the balance sheet date with that assessed at the date of initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort, including forward-looking information. In particular, the following information is taken into account::

- failure to make payments of principal or interest on their contractually due dates;
- an actual or expected significant deterioration in a financial instrument's external or internal credit rating (if available);
- an actual or expected significant deterioration in the operating results of the debtor;
   and
- existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

The Group considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the Group in full (without recourse by the Group to actions such as realising security (if any is held)).

#### Credit-impaired financial assets

At each balance sheet date, the Group assesses whether financial assets carried at amortised cost and debt investments at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract, such as a default or delinquency in interest or principal payments;

- for economic or contractual reasons relating to the borrower's financial difficulty, the Group having granted to the borrower a concession that would not otherwise consider;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

#### Presentation of allowance for ECL

ECLs are remeasured at each balance sheet date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognized as an impairment gain or loss in profit or loss. The Group recognizes an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for debt investments that are measured at FVOCI, for which the loss allowance is recognized in other comprehensive income.

#### Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. A write-off constitutes a derecognition event. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

Subsequent recoveries of an asset that was previously written off are recognized as a reversal of impairment in profit or loss in the period in which the recovery occurs.

#### (b) Impairment of other assets

The carrying amounts of the following assets are reviewed at each balance sheet date based on the internal and external sources of information to determine whether there is any indication of impairment:

- fixed assets
- construction in progress
- right-of-use assets
- intangible assets
- development costs
- goodwill
- long-term deferred expenses
- long-term equity investments
- investment properties

If any indication exists, the recoverable amount of the asset is estimated. In addition, the Group estimates the recoverable amounts of goodwill at each year-end, irrespective of whether there is any indication of impairment. Goodwill is allocated to each asset group, or set of asset groups, that is expected to benefit from the synergies of the combination for the purpose of impairment testing.

An asset group is composed of assets directly related to cash generation and is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or asset groups.

The recoverable amount of an asset (or asset group, set of asset groups) is the higher of its fair value (see Note 3(15)) less costs to sell and its present value of expected future cash flows.

The present value of expected future cash flows of an asset is determined by discounting the future cash flows, estimated to be derived from continuing use of the asset and from its ultimate disposal, to their present value using an appropriate pre-tax discount rate.

An impairment loss is recognized in profit or loss when the recoverable amount of an asset is less than its carrying amount. A provision for impairment of the asset is recognized accordingly. Impairment losses related to an asset group or a set of asset groups are allocated first to reduce the carrying amount of any goodwill allocated to the asset group or set of asset groups, and then to reduce the carrying amount of the other assets in the asset group or set of asset groups on a pro rata basis. However, such allocation would not reduce the carrying amount of an asset below the highest of its fair value less costs to sell (if measurable), its present value of expected future cash flows (if determinable) and zero.

Once an impairment loss is recognized, it is not reversed in a subsequent period.

#### (15) Fair value measurement

Unless otherwise specified, the Group measures fair value measurement as below:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When measuring fair value, the Group takes into account the characteristics of the particular asset or liability (including the condition and location of the asset and restrictions, if any, on the sale or use of the asset) that market participants would consider when pricing the asset or liability at the measurement date, and uses valuation techniques that are appropriate in the circumstances and for which sufficient data and other information are available to measure fair value. Valuation techniques mainly include the market approach, the income approach and the cost approach.

#### (16) Employee benefits

#### (a) Short-term employee benefits

Employee wages or salaries, bonuses, social security contributions such as medical insurance, work injury insurance, maternity insurance and housing fund, measured at the amount incurred or accrued at the applicable benchmarks and rates, are recognized as a liability as the employee provides services, with a corresponding charge to profit or loss or included in the cost of assets where appropriate.

## (b) Post-employment benefits – defined contribution plans

Pursuant to the relevant laws and regulations of the People's Republic of China, the Group participated in a defined contribution basic pension insurance plan in the social insurance system established and managed by government organisations. The Group makes contributions to basic pension insurance plans based on the applicable benchmarks and rates stipulated by the government. Basic pension insurance contributions payable are recognized as a liability as the employee provides services, with a corresponding charge to profit or loss or included in the cost of assets where appropriate.

#### (c) Termination benefits

When the Group terminates the employment with employees before the employment contracts expire, or provides compensation under an offer to encourage employees to accept voluntary redundancy, a provision is recognized with a corresponding expense in profit or loss at the earlier of the following dates:

- When the Group cannot unilaterally withdraw the offer of termination benefits because of an employee termination plan or a curtailment proposal;
- When the Group has a formal detailed restructuring plan involving the payment of termination benefits and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

### (17) Income tax

Current tax and deferred tax are recognized in profit or loss except to the extent that they relate to a business combination or items recognized directly in equity (including other comprehensive income).

Current tax is the expected tax payable calculated at the applicable tax rate on taxable income for the year, plus any adjustment to tax payable in respect of previous years.

At the balance sheet date, current tax assets and liabilities are offset only if the Group has a legally enforceable right to set them off and also intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases, which include the deductible tax losses and tax credits carried forward to subsequent periods. Deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilized

Deferred tax is not recognized for the temporary differences arising from the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting profit nor taxable profit (or deductible loss). Deferred tax is not recognized for taxable temporary differences arising from the initial recognition of goodwill.

At the balance sheet date, deferred tax is measured based on the tax consequences that would follow from the expected manner of recovery or settlement of the carrying amount of the assets and liabilities, using tax rates enacted at the reporting date that are expected to be applied in the period when the asset is recovered or the liability is settled.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date, and is reduced to the extent that it is no longer probable that the related tax benefits will be utilized. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

At the balance sheet date, deferred tax assets and liabilities are offset if all the following conditions are met:

- the taxable entity has a legally enforceable right to offset current tax liabilities and assets,
   and
- they relate to income taxes levied by the same tax authority on either: the same taxable entity; or different taxable entities which intend either to settle the current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

#### (18) Provisions

A provision is recognized for an obligation related to a contingency if the Group has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Where the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows.

#### (19) Revenue recognition

Revenue is the gross inflow of economic benefits arising in the course of the Group's ordinary activities when the inflows result in increase in shareholders' equity, other than increase relating to contributions from shareholders.

Revenue is recognized when the Group satisfies the performance obligation in the contract by transferring the control over relevant goods or services to the customers.

Where a contract has two or more performance obligations, the Group determines the standalone selling price at contract inception of the distinct good or service underlying each performance obligation in the contract and allocates the transaction price in proportion to those stand-alone selling prices. The Group recognizes as revenue the amount of the transaction price that is allocated to each performance obligation. The stand-alone selling price refers to the price of the Group selling goods or providing services to customers separately. If the standalone selling price cannot be directly observed, the Group will consider all relevant information reasonably obtained, and estimate the stand-alone selling price with the observable input value to the maximum extent.

The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. The Group recognizes the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. The consideration which the Group expects to refund to the customer is recognized as refund liabilities and excluded from transaction price. Where the contract contains a significant financing component, the Group recognizes the transaction price at an amount that reflects the price that a customer would have paid for the promised goods or services if the customer had paid cash for those goods or services when (or as) they transfer to the customer. The difference between the amount of promised consideration and the cash selling price is amortised using an effective interest method over the contract term. The Group does not adjust the consideration for any effects of a significant financing component if it expects, at contract inception, that the period between when the Group transfers a promised good or service to a customer and when the customer pays for that good or service will be one year or less.

The Group satisfies a performance obligation over time if one of the following criteria is met; or otherwise, a performance obligation is satisfied at a point in time:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the customer can control the asset created or enhanced during the Group's performance; or
- the Group's performance does not create an asset with an alternative use to it and the Group has an enforceable right to payment for performance completed to date.

For performance obligation satisfied over time, the Group recognizes revenue over time by measuring the progress towards complete satisfaction of that performance obligation. When the outcome of that performance obligation cannot be measured reasonably, but the Group expects to recover the costs incurred in satisfying the performance obligation, the Group recognizes revenue only to the extent of the costs incurred until such time that it can reasonably measure the outcome of the performance obligation.

For performance obligation satisfied at a point in time, the Group recognizes revenue at the point in time at which the customer obtains control of relevant goods or services. To determine whether a customer has obtained control of goods or services, the Group considers the following indicators:

- the Group has a present right to payment for the goods or services;
- the Group has transferred physical possession of the goods to the customer;
- the Group has transferred the legal title of the goods or the significant risks and rewards of ownership of the goods to the customer; and
- the customer has accepted the goods or services.

A contract asset is the Group's right to consideration in exchange for goods or services that it has transferred to a customer when that right is conditional on something other than the passage of time. Accounts receivable is the Group's right to consideration that is unconditional (only the passage of time is required). A contract liability is the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

The following is the description of accounting policies regarding revenue from the Group's principal activities:

## (a) Sale of goods

The Group's goods sales include customer collection and delivery to designated location.

#### (i) Customer collection

When the Group issues the delivery notice and delivers it to the customer, the customer obtains control of the goods and revenue is recognized.

#### (ii) Delivery to the designated location

When the Group delivers the goods to the location designated by customers and receives the receipt notes from customers, the customer obtains control of the goods and revenue is recognized.

## (b) Rendering of services

Revenue is measured at the fair value of the consideration received or receivable under the contract or agreement.

Where the outcome of a transaction involving the rendering of services can be estimated reliably at the balance sheet date, revenue is recognized by reference to the stage of completion based on the progress of work performed.

Where the outcome cannot be estimated reliably, revenues are recognized to the extent of the costs incurred that are expected to be recoverable, and an equivalent amount is charged to profit or loss as service cost; otherwise, the costs incurred are recognized in profit or loss and no service revenue is recognized.

### (20) Government grants

Government grants are non-reciprocal transfers of monetary or non-monetary assets from the government to the Group except for capital contributions from the government in the capacity as an investor in the Group.

A government grant is recognized when there is reasonable assurance that the grant will be received and that the Group will comply with the conditions attaching to the grant.

If a government grant is in the form of a transfer of a monetary asset, it is measured at the amount received or receivable. If a government grant is in the form of a transfer of a non-monetary asset, it is measured at fair value.

A government grant related to an asset is recognized as deferred income and amortised over the useful life of the related asset on a reasonable and systematic manner as other income or non-operating income. A grant that compensates the Group for expenses or losses to be incurred in the future is recognized as deferred income, and included in other income or non-operating income in the periods in which the expenses or losses are recognized. Otherwise, the grant is included in other income or non-operating income directly.

#### (21) Specific reserve

The Group recognizes a safety fund in the specific reserve pursuant to relevant government regulations, with a corresponding increase in the costs of the related products or expenses. When the safety fund is subsequently used for revenue expenditure, the specific reserve is reduced accordingly. On utilization of the safety fund for fixed assets, the specific reserve is reduced as the fixed assets are recognized, which is the time when the related assets are ready for their intended use; in such cases, an amount that corresponds to the reduction in the specific reserve is recognized in accumulated depreciation with respect to the related fixed assets. As a consequence, such fixed assets are not depreciated in subsequent periods.

#### (22) Borrowing costs

Borrowing costs incurred directly attributable to the acquisition, construction of a qualifying asset are capitalized as part of the cost of the asset. Other borrowing costs are recognized as financial expenses when incurred.

During the capitalization period, the amount of interest (including amortization of any discount or premium on borrowing) to be capitalized in each accounting period is determined as follows:

- Where funds are borrowed specifically for the acquisition, construction of a qualifying asset, the amount of interest to be capitalized is the interest expense calculated using effective interest rates during the period less any interest income earned from depositing the borrowed funds or any investment income on the temporary investment of those funds before being used on the asset.
- To the extent that the Group borrows funds generally and uses them for the acquisition, construction of a qualifying asset, the amount of borrowing costs eligible for capitalization is determined by applying a capitalization rate to the weighted average of the excess amounts of cumulative expenditures on the asset over the above amounts of specific borrowings. The capitalization rate is the weighted average of the interest rates applicable to the general-purpose borrowings.

The capitalisation period is the period from the date of commencement of capitalisation of borrowing costs to the date of cessation of capitalisation, excluding any period over which capitalisation is suspended. Capitalisation of borrowing costs commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities of acquisition construction that are necessary to prepare the asset for its intended use are in progress, and ceases when the assets become ready for their intended use. Capitalisation of borrowing costs is suspended when the acquisition construction activities are interrupted abnormally for a period of more than three months.

#### (23) Profit distributions to owners

Distributions of profit proposed in the profit appropriation plan to be approved after the balance sheet date are not recognized as a liability at the balance sheet date but are disclosed in the notes separately.

#### (24) Related parties

If a party has the power to control, jointly control or exercise significant influence over another party, or vice versa, or where two or more parties are subject to common control or joint control from another party, they are considered to be related parties. Related parties may be individuals or enterprises. Enterprises with which the Company is under common control only from the State and that have no other related party relationships are not regarded as related parties.

#### (25) Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system after taking materiality principle into account. Two or more operating segments may be aggregated into a single operating segment if the segments have similar economic characteristics and are same or similar in respect of the nature of products and services, the nature of production processes, the types or classes of customers for the products and services, the methods used to distribute the products or provide the services, and the nature of the regulatory environment.

Inter-segment revenues are measured on the basis of the actual transaction prices for such transactions for segment reporting, and segment accounting policies are consistent with those for the consolidated financial statements.

#### (26) Significant accounting estimates and justments

The preparation of financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates as well as underlying assumptions and uncertainties involved are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Notes 3(6), (7) and (9) contain information about the accounting estimates relating to depreciation and amortisation of assets such as fixed assets and intangible assets. Notes 10, 11, 12, 13, 14, 15, 17, 18, 19, 20, 21, 22, 23, 25 and 26 contain information about the accounting estimates relating to provisions for impairment of various types of assets. Other significant accounting estimates are as follows:

Note 60: Valuation of fair value of financial instruments

## 4 Changes in accounting policies

## (1) Description and reasons of changes in accounting policies

The following accounting standards take effect for annual periods beginning on or after 1 January 2020 and are relevant to the Company.

- CAS Bulletin No.13 (Caikuai [2019] No.21)
- The Accounting Treatment of COVID-19-Related Rent Concessions (Caikuai [2020] No.10)

#### (a) CAS Bulletin No.13

CAS Bulletin No.13 has amended the three elements of constituting a business, provides specific guidance on the determination of a business, and introduces an optional concentration test when the acquirer determine whether an acquired set of assets that not involving enterprises under common control constitute a business.

In addition, CAS Bulletin No.13 has further clarified that related parties of an entity also include the joint venture(s) or associate(s) of the other members (including the parent and subsidiaries) in the same group that includes the entity, and the other joint venture(s) or associate(s) of the investors who exercise joint control over the entity, etc.

CAS Bulletin No.13 takes effect on 1 January 2020. The Company has adopted the accounting policy change prospectively. The adoption of CAS Bulletin No.13 does not have any significant effect on the financial position, financial performance or related party disclosures of the Company.

## (b) Caikuai [2020] No.10

Caikuai [2020] No.10 provides a practical expedient under certain conditions for rent concessions occurring as a direct consequence of the Covid-19 pandemic. If an entity elects to apply the practical expedient, the entity does not need to assess whether a lease modification has occurred or to reassess the lease classification.

Caikuai [2020] No.10 takes effect on 24 June 2020 (the implementation date). The entity is allowed to adjust the related rent concessions that occurred between 1 January 2020 and the implementation date. The adoption of Caikuai [2020] No.10 does not have any significant effect on the financial position or financial performance of the Company.

#### 5 Taxation

## (1) Main types of taxes and corresponding tax rates

| Tax type                 | Tax basis and applicable rate  |  |  |  |
|--------------------------|--|--|--|--|
| Value-added tax<br>(VAT) | Output VAT is 0%、3%、6%、9% or 13% of product sales and taxable services revenue, based on tax laws. The basis for VAT payable is to deduct input VAT from the output VAT for the period |  |  |  |

## (2) Income tax

The statutory income tax rate of the Company is 25% (2019: 25%). The applicable income tax rate for the year is the statutory rate.

Except for the preferential tax treatments stated below, the tax rate for all the other subsidiaries of the Company for the year is 25% (2019: 25%).

Subsidiaries that are entitled to preferential tax treatments are as follows:

| Names of enterprises                            | Preferential rate | Reason                 |
|---|-------------------|------------------------|
|   |                   | Tax preference in West |
| Sinochem Chongqing Fuling Chemical Fertilizer   | 0.517             | Development            |
| Co., Ltd. ("Sinochem Fuling")                   | 15%               | Strategy               |
|   |                   | Tax preference in      |
|   |                   | West                   |
| Chongqing Fuling Qilixing Tiegongshui           |                   | Development            |
| Transportation Co., Ltd.("Tiegongshui")         | 15%               | Strategy               |
| Sinochem Yunlong Co., Ltd. ("Sinochem Yunlong") | 15%               | Hi-tech enterprise     |

## (3) Taxes payable

## (2) The ageing analysis of accounts receivable is as follows:

|   | The Group     |               | The Con       | mpany          |
|---|---------------|---------------|---------------|----------------|
|   | 2020          | 2019          | 2020          | 2019           |
| Within 1 year (inclusive)                   | 35,703,208.18 | 39,999,831.87 | 10,094,313.66 | 106,999,430.53 |
| Over 1 year but within 2 years (inclusive)  | 1,451,968.25  | 3,491.08      | 3,949,737.06  | 20,530.50      |
| Over 2 years but within 3 years (inclusive) | -             | 207,018.82    | -             | -              |
| Over 3 years                                | 5,375,006.76  | 5,398,518.70  |               | 821,667.04     |
| Sub-total                                   | 42,530,183.19 | 45,608,860.47 | 14,044,050.72 | 107,841,628.07 |
| Less: loss allowance                        | 4,511,643.50  | 4,158,542.45  | -             | 22,392.00      |
| Total                                       | 38,018,539.69 | 41,450,318.02 | 14,044,050.72 | 107,819,236.07 |

The ageing is counted starting from the date when accounts receivable are recognized.

#### (3) Assessment of ECLs on accounts receivable:

The Group measures loss allowances for trade receivables at an amount equal to lifetime ECLs, which is calculated using a provision matrix. As the Group's historical credit loss experience does not indicate significantly different loss patterns for different customer segments, the loss allowance based on past due status is not further distinguished between the Group's different customer bases.

#### 2020

|   | Loss given default | Carrying amount at<br>the end of<br>the year | Impairment loss<br>at the end of<br>the year |
|---|--------------------|--|--|

| Balance at the beginning of the year  | 4,158,542.45                              | 4,139,420.45            | 22,392.00   |           |
| Additions during the year<br>Recoveries or reversals during the year<br>Written-off during the year | 668,353.24<br>(27,392.00)<br>(287,860.19) | 22,392.00<br>(3,270.00) | (22,392.00) | 22,392.00 |
| Balance at the end of the year  | 4,511,643.50                              | 4,158,542.45            |             | 22,392.00 |

## 12 Receivables under financing

|                  | The Gr        | тоир           | The Con      | npany          |
|------------------|---------------|----------------|--------------|----------------|
|                  | 2020          | 2019           | 2020         | 2019           |
| Bills receivable | 30,232,728.58 | 369,084,673.33 | 4,068,398.97 | 307,232,591.32 |

As at 31 December 2020, the receivables under financing that the Group has endorsed but not matured is as follows:

|                       | The Gi  | roup  | The Cor   | npany   |
|-----------------------|---|---|---|---|
|                       | Amount of<br>derecognition at<br>the end of the<br>period | Amount not<br>derecognized at<br>the end of the<br>period | Amount of<br>derecognition at<br>the end of the<br>period | Amount not<br>derecognized at<br>the end of the<br>period |
| Bank acceptance bills | 426,685,873.21  |   | 404,775,519.80  |   |

## 13 Prepayments

## (1) Prepayments by category:

|                                     | The Group                         |                                   | The Company                      |                  |
|-------------------------------------|-----------------------------------|-----------------------------------|----------------------------------|------------------|
|                                     | 2020                              | 2019                              | 2020                             | 2019             |
| Prepayments<br>Less: loss allowance | 1,550,803,768.59<br>15,640,441.10 | 1,403,136,186.65<br>11,644,492.44 | 1,801,940,463.44<br>3,806,975.66 | 1,650,319,151.04 |
| Total                               | 1,535,163,327.49                  | 1,391,491,694.21                  | 1,798,133,487.78                 | 1,650,319,151.04 |

## (2) The ageing analysis of prepayments is as follows:

|   | The Group        |                  | The Company      |                  |
|---|------------------|------------------|------------------|------------------|
|   | 2020             | 2019             | 2020             | 2019             |
| Within 1 year (inclusive)                   | 1,526,702,406.96 | 1,372,540,839.03 | 1,795,555,832.64 | 1,648,132,664.24 |
| Over 1 year but within 2 years (inclusive)  | 5,041,141.26     | 5,685,750.66     | 4,606,750.33     | 1,897,936.94     |
| Over 2 years but within 3 years (inclusive) | 1,772,338.62     | 3,219,936.11     | 1,490,194.51     | 269,919.86       |
| Over 3 years                                | 17,287,881.75    | 21,689,660.85    | 287,685.96       | 18,630.00        |
| Sub-total                                   | 1,550,803,768.59 | 1,403,136,186.65 | 1,801,940,463.44 | 1,650,319,151.04 |
| Less: loss allowance                        | 15,640,441.10    | 11,644,492.44    | 3,806,975.66     |                  |
| Total                                       | 1,535,163,327.49 | 1,391,491,694.21 | 1,798,133,487.78 | 1,650,319,151.04 |

The ageing is counted starting from the date when prepayments are recognized.

## (3) Movements of loss allowance:

|                                       | The Group     |                | The Company  |      |
|---------------------------------------|---------------|----------------|--------------|------|
|                                       | 2020          | 2019           | 2020         | 2019 |
| Balance at the beginning of the year  | 11,644,492.44 | 15,083,742.71  |              | 4    |
| Additions/(reversals) during the year | 4,737,557.48  | (1,717,411.24) | 3,986,137.16 | +    |
| Written-off during the year           | (741,608.82)  | (1,721,839.03) | (179,161.50) | -    |
| Balance at the end of the year        | 15,640,441.10 | 11,644,492.44  | 3,806,975.66 | 1    |

## 14 Other receivables

|                      | The Group |                | The Company    |                |                |
|----------------------|-----------|----------------|----------------|----------------|----------------|
|                      | Note      | 2020           | 2019           | 2020           | 2019           |
| Interest receivable  |           |                | 9,469,773.37   | -              | 9,609,415.87   |
| Dividends receivable |           |                |                | 36,000,000.00  | 36,000,000.00  |

The ageing is counted starting from the date when other receivables are recognized.

## (c) An analysis of the movements of loss allowance for the year is as follows:

|                                      | The Group     |               | The Com       | pany          |
|--------------------------------------|---------------|---------------|---------------|---------------|
|                                      | 2020          | 2019          | 2020          | 2019          |
| Balance at the beginning of the year | 36,758,375.11 | 36,758,375.11 | 22,394,664.54 | 22,394,664.54 |
| Additions during the year            | 13,806,353.69 | 199,202.90    | 12,253,212.27 | -             |
| Recoveries or reversals during the   |               |               |               |               |
| year                                 | (3,384.82)    |               | (3,384.82)    |               |
| Written-off during the year          | (1,242.00)    | (199,202.90)  | (1,242.00)    | -             |
| Balance at the end of the year       | 50,560,101.98 | 36,758,375.11 | 34,643,249.99 | 22,394,664.54 |

#### 15 Inventories

## (1) An analysis of balance of inventories is as follows:

| The Group   | 2020             | 2019             |
|---|------------------|------------------|
| Raw materials                                     | 300,670,105.05   | 554,211,845.93   |
| Work in progress                                  | 55,772,314.31    | 59,388,176.50    |
| Finished goods                                    | 4,664,386,595.87 | 4,383,506,690.25 |
| Consumables                                       | 53,413,472.57    | 51,732,947.03    |
| Sub-total   | 5,074,242,487.80 | 5,048,839,659.71 |
| Less: Provision for the impairment of inventories | 37,979,698.14    | 26,199,040.57    |
| Total   | 5,036,262,789.66 | 5,022,640,619.14 |

| The Company   | 2020                              | 2019                             |
|---|-----------------------------------|----------------------------------|
| Finished goods<br>Less: Provision for the impairment of inventories | 4,392,035,929.76<br>16,308,860.00 | 4,226,825,532.93<br>7,018,157.35 |
| Total   | 4,375,727,069.76                  | 4,219,807,375.58                 |

At the year end, neither the Group and the Company had the inventories pledged as security (2019: Nil).

## (2) An analysis of provision for the impairment of inventories is as follows:

| The Group     |   |  |   |  |
|---------------|---|--|---|--|
| Balance at    | Provision made  | Transferred out  | Balance at  |  |
| 1 Jan 2020    | for the year  | for the year   | 31 Dec 2020   |  |
| 15,705,358.78 | 4,318,948.96  | (2,762,102.54)   | 17,262,205.20   |  |
| 7,766,339.34  | 16,911,413.88   | (7,257,479.35)   | 17,420,273.87   |  |
| 2,727,342.45  | 569,876.62  | -  | 3,297,219.07  |  |
| 26,199,040.57 | 21,800,239.46   | (10,019,581.89)  | 37,979,698.14   |  |
| The Group     |   |  |   |  |

The government of Fuling District in Chongqing ("the Government") and the Group entered into a relocation agreement ("the relocation agreement") on 6 August 2019. Pursuant to the relocation agreement, Sinochem Chongqing Fuling Chemical Fertilizer Co., Ltd. ("Sinochem Fuling"), a subsidiary of the Group, will relocate its factories in Nananpu, demolish the buildings, restore the land and return it to the Government no later than June 2021. In return, the Government will compensate the losses of Sinochem Fuling arising from the relocation, with a cap of RMB 1billion, after the Government receives the land.

Sinochem Fuling started demolishing the factory in November 2019. The carrying amounts of the related property, plant and equipment and also the land lease prepayment were reclassified as other long-term assets. Based on current estimation, the directors of the Company are of the view that the compensation receivable is sufficient to cover the expected loss of the Group and hence no impairment provision is made over these other long-term assets as at 31 December 2020.

In 2020, the Group did recognize impairment loss RMB14,256,724.34 for the fixed assets which are obsolete, damaged or could not bring economic benefits (2019: RMB13,562,453.62).

For the details of pledged fixed assets, please refer to Note 29.

#### 25 Goodwill

The Group 2020 & 2019

Cost

Balance at the beginning and the end of the year 531,073,744.64

Less: Provision for impairment

Balance at the beginning and the end of the year

Carrying amounts

Balance at the beginning and the end of the year 531,073,744.64

Impairment testing on goodwill

Production-Sinochem Yunlong

For the purposes of impairment testing, goodwill has been allocated to the cash-generating units ("CGUs") of the related segments as follows:

2020 2019

531,073,744.64

531,073,744.64

The recoverable amounts of these CGUs have been determined on the basis of value in use calculations. The key assumptions for the value in use calculations are those regarding the discount rates, including estimated selling prices and selling quantities used in the cash flow forecasts. Cash flow forecasts are based on past practices and expectations of future changes in the market. The directors of the Company estimate discount rates using pre-tax rates that reflect current market assessment of the time value of money and the risks specific relating to the CGUs. Cash flow forecasts of each CGU are derived from financial budgets of 2021 approved by the directors of the Company. The growth rates for the first 3 years from 2021 are based on the relevant CGUs' past performance and management's expectation for the market development and for the following years are based on steady growth rates.

The key assumptions used in the value in use calculation for related CGUs include:

|   | Production<br>2020 |
|---|--------------------|
| Pre-tax discount rate                                   | 12.9%              |
| Average growth rate for the first three years from 2021 | 3.0%               |
| Steady growth rate for the following years              | 3.0%               |

The value in use calculated is higher than the carrying amount for each CGU, accordingly, no impairment of goodwill was recognized for the year ended 31 December 2020.

## 26 Long-term deferred expenses

### Deferred tax assets not recognized

As the accounting policy described in Note 3(17), no deferred tax assets were recognized on the cumulative tax losses of approximately RMB6,186,097,531.54 (2019: RMB6,620,361,566.40) as the Group determines that the realization of the related tax benefit through future taxable profits is not probable. The deductible tax losses will expire within 5 years from incurred under current tax law.

At 31 December 2020, the Group and the Company had no deferred tax liabilities unrecognized (2019: Nil).

## 58 Segment reporting

The Group's operating segments based on information reported to the chief operating decision maker ("CODM") for the purpose of resource allocation and performance assessment. During the reporting period, the Group has changed the structure of its internal organisation in a manner that causes the composition of its reportable segments to change as follows:

- Basic fertilizers: sourcing and trading of straight fertilizers such as nitrogen, phosphate and potash
- Distribution: building of distribution channels, sourcing and selling of compound fertilizers and new type of fertilizer
- Production: production and sales of fertilizers and MCP/DCP, and also including share of results of associates held by subsidiaries in Production segment

Segment results, assets and liabilities:

The accounting policies of the operating segments are the same as the Group's accounting policies described in Note 3. Segment profit represents the profit earned by each segment without taking into account of unallocated expenses/income, share of results of associates and joint ventures and finance costs. This is the measure reported to the Group's CODM for the purposes of resource allocation and performance assessment. In addition, the CODM also regularly review the segment information in relation to the share of results of joint ventures.

Inter-segment sales are charged at market prices between group entities.

During the reporting period, the group changed the way it evaluates the performance of each segment. Operating expenses, share of the performance of associated companies and joint ventures, and distribution of interest income and interest expenses have been changed according to the new performance evaluation method. In order to be consistent with the presentation of the current period, some comparative figures in the segment data have been adjusted. Given the production and trading of fertilizers are closely linked, the CODM considered segment assets and liabilities information was not relevant in assessing performance of and resources allocation to the operating segments.

## 59 Risk analysis and sensitivity analysis for financial instruments

The Group has exposure to the following risks from its use of financial instruments in the normal course of the Group's operation, which mainly include:

- Credit risk
- Liquidity risk
- Interest rate risk
- Foreign currency risk

This note presents information about the Group's exposure to each of the above risks and their sources, the Group's objectives, policies and processes for measuring and managing risks and etc.

The Group aims to seek the appropriate balance between the risks and benefits from its use of financial instruments and to mitigate the adverse effects that the risks of financial instruments have on the Group's financial performance. Based on such objectives, the Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

## (1) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Group's credit risk is primarily attributable to cash at bank and receivables. Exposure to these credit risks are monitored by management on an ongoing basis.

The Company's exposure to credit risk arising from cash and cash equivalents is limited because the counterparties are banks and financial institutions for which the Company considers to have low credit risk.

Except for the financial guarantees given by the Group as set out in note 62, the Group does not provide any other guarantees which would expose the Group to credit risk. The maximum expose to credit risk in respect of these financial guarantees at the end of the reporting period is disclosed in note 62.

## Trade receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer rather than the industry, country or area in which the customers operate and therefore significant concentrations of credit risk arise primarily when the Group has significant exposure to individual customers.

In respect of trade receivables, the Group has established a credit policy under which individual credit evaluations are performed on all customers to determine the credit limit and terms applicable to the customers. These evaluations focus on the customers' financial position, the external ratings of the customers and their bank credit records where available. Receivables are due within 90 days from the date of billing. Normally, the Group does not obtain collateral from customers

For specific information on accounts receivable, please refer to note 11.

## (2) Liquidity risk

Liquidity risk is the risk that an enterprise may encounter deficiency of funds in meeting obligations associated with financial liabilities. The Company and its subsidiaries are responsible for their own cash management, including short-term investment of cash surpluses and the raising of loans to cover expected cash demands, subject to approval by the Company's board when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor its liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash, readily realisable marketable securities and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The following tables show the remaining contractual maturities at the balance sheet date of the Group's and the Company's financial assets and financial liabilities, which are based on contractual cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the balance sheet date) and the earliest date the Group or the Company can be required to pay:

## (3) Interest rate risk

Interest-bearing financial instruments at variable rates and at fixed rates expose the Group to cash flow interest rate risk and fair value interest risk, respectively. The Group determines the appropriate weightings of the fixed and floating rate interest-bearing instruments based on the current market conditions and performs regular reviews and monitoring to achieve an appropriate mix of fixed and floating rate exposure.

As at 31 December, the Group and the Company held the following interest-bearing financial instruments: (a)

| Annual           | Annu  | Ann   |  |
|------------------|---|---|--|
| interest rate    | RMB interest rate   |   | RMB  |
| 0.00% - 3.50%    | 1,584,575,989.47 0.00% - 3.50   |   | 1,584,575,989.47   |
| 2.85% - 6.05%    | 920,000,000.00 2.85% - 6.06   |   | 920,000,000.00   |
| 3.85%            | 3.8   | 800   | 950,000,000,000  |
|                  | 2,504,575,989.47  | 2,504,575,989.47  | 2,240,025,067.61   |
| 2.4% - 3.85%     | 527,815,500.00 2.4% - 3.  |   | 527,815,500.00   |

|                  | 527,815,989.47<br>920,000,000.00<br>2,504,575,989.47<br>527,815,500.00<br>21,601,735.66<br>2,400,000,000.00 | 1,584,575,98<br>920,000,00<br>2,504,575,98<br>527,815,50<br>21,601,77<br>2,400,000,00 | 0.3% - 3.77% 1,584,575,98<br>0.3% - 6.05% 920,000,00<br>4.20% - 6.05% 920,000,00<br>2,504,575,98<br>1% - 4.35% 527,815,50<br>4.50% 21,601,77<br>2.95% 2,400,000,00 |

## (b) Sensitivity analysis

Since the Group has no variable-rate borrowings at the end of the reporting period, no sensitivity analysis about interest rates risk is prepared.

## (4) Foreign currency risk

In respect of cash at bank and on hand and accounts payable denominated in foreign currencies other than the functional currency, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

(a) As at 31 December, the Group's and the Company's exposure to currency risk arising from recognized assets or liabilities denominated in foreign currencies is presented in the following tables. For presentation purposes, the amounts of the exposure are shown in Renminbi, translated using the spot rate at the balance sheet date.

|   | The Group   |                | The Con                            | npany          |
|---|---|----------------|------------------------------------|----------------|
|   | 2020  | 2019           | 2020                               | 2019           |
|   | USD   | USD            | USD                                | USD            |
| Cash at bank and on hand                                  | 1,742,406.49  | 10,609,828.69  | 1,336,815.12                       | 8,195,678.40   |
| Accounts receivable                                       | 13,892,787.11                                       | 12,016,260.33  |                                    |                |
| Accounts payable  | (31,941,416.50)                                     | -              | (31,941,416.50)                    |                |
| Other payables  | (16,818,874.76)                                     | (5,092,991.48) | (16,818,874.76)                    | (5,092,991.48) |
| Total   | (33,125,097.66)                                     | 17,533,097.54  | (47,423,476.14)                    | 3,102,686.92   |
| Accounts receivable<br>Accounts payable<br>Other payables | 13,892,787.11<br>(31,941,416.50)<br>(16,818,874.76) | 12,016,260.33  | (31,941,416.50)<br>(16,818,874.76) | (5,092,991.48) |

(b) The following are the exchange rates for Renminbi against foreign currencies applied by the Group and the Company:

|     | Average rate | 9      | Reporting date mid- | spot rate |
|-----|--------------|--------|---------------------|-----------|
|     | 2020         | 2019   | 2020                | 2019      |
| USD | 6.8945       | 6.9010 | 6.5249              | 6.9762    |

## (c) Sensitivity analysis

Assuming all other risk variables remained constant, a 5% strengthening of the Renminbi against the US dollar at 31 December would have increased the Group's and the Company's equity and net loss by the amount shown below, whose effect is in Renminbi and translated using the spot rate at the year-end date:

|                        | The Gr         | oup               | The Company   |                   |  |
|------------------------|----------------|-------------------|---------------|-------------------|--|
|                        | Equity<br>RMB  | Net Profit<br>RMB | Equity<br>RMB | Net Profit<br>RMB |  |
| As at 31 December 2020 | (1,153,415.08) | (1,153,415.08)    | (617,225.88)  | (617,225.88)      |  |
| As at 31 December 2019 | (657,491.16)   | (657,491.16)      | (116,350.76)  | (116,350.76)      |  |

A 5% weakening of the Renminbi against the US dolla at 31 December would have had the equal but opposite effect on them to the amounts shown above, on the basis that all other variables remained constant.

The sensitivity analysis above assumes that the change in foreign exchange rates had been applied to re-measure those financial instruments held by the Group which expose the Group to foreign currency risk at the balance sheet date. The analysis is performed on the same basis for the previous year.

## 60 Fair value

## (1) Fair value measurement

## (a) Fair value hierarchy

The following table presents the fair value information and the fair value hierarchy, at the end of the current reporting period, of the Group's and the Company's assets and liabilities which are measured at fair value at each balance sheet date on a recurring or non-recurring basis. The level in which fair value measurement is categorized is determined by the level of the fair value hierarchy of the lowest level input that is significant to the entire fair value measurement. The levels of inputs are defined as follows:

Level 1 inputs: unadjusted quoted prices in active markets that are observable at the measurement date for identical assets or liabilities;

Level 2 inputs: inputs other than Level 1 inputs that are either directly or indirectly observable for underlying assets or liabilities;

Level 3 inputs: inputs that are unobservable for underlying assets or liabilities.

During the year ended 31 December 2020, there were no transfers between Level 1 and Level 2. The Group's policy is to recognize transfers between levels of fair value hierarchy as at the end of the reporting period in which the occur.

## (b) Level 3 fair value measurement

The Group has performed valuations for the unlisted available-for-sale equity securities which are categorized into Level 3 of the fair value hierarchy annually. A valuation report, issued by qualified independent valuers, with analysis of changes in fair value measurement is prepared by the Company at the end of the reporting period.

(2) Fair value of other financial instrument (items not measured at fair value at the end of the year)

The directors of the Group and the Company consider that the carrying amounts of financial assets and financial liabilities recorded at amortized cost in the consolidated financial statements approximate their fair values:

## 61 Capital management

The Group's primary objectives when managing capital are to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders, by pricing products and services commensurately with the level of risk and by securing access to finance at a reasonable cost.

The capital structure of the Group consists of net debt (including loans), net of cash and cash equivalents and equity attributable to owners of the Company comprising issued equity, retained profits and other reserves.

The directors of the Company review the capital structure on a semi-annual basis. As part of this review, the directors consider the cost of capital and the risks associated with each lass of capital. The Group will balance its overall capital structure through the payment of dividends, new share issues and share buy-backs as well as the issue of new debt or the redemption of existing debt.

## 62 Guarantee

In 2019, Sinochem Fertilizer entered into a guarantee agreement, pursuant to which, Sinochem Fertilizer will provide a guarantee in favor of Shanxi Jincheng Anthracite Mining Group Co., Ltd. ("Jincheng Anthracite Mining") for loans and guarantee provided by Jincheng Anthracite Mining to Shanxi Jinmei Tianyuan Chemical Co., Ltd. ("Jinmei Tianyuan"). Sinochem Fertilizer holds 15.11% equity interest in Jinmei Tianyuan and designates it at FVOCI (non-recycling). According to the guarantee agreement, Sinochem Fertilizer pledged its 15.11% equity interest in Jinmei Tianyuan to Jincheng Anthracite Mining to secure the loans and guarantee granted and Sinochem Fertilizer's liabilities are to cap at the fair value of 15.11% equity interest in Jinmei Tianyuan.

## 63 Commitments

As at 31 December, the capital commitments of the Group and the Company are summarized as follows:
